M27612-UAE-1

Description

M27612-UAE-1 is a **Wi-Fi M.2 platform A E key Module USB signal** based on Mediatek MT7612U which is a highly integrated single chip with 2.4 / 5GHz dual bands 802.11 a/b/g/n/ac and provides the highest PHY rate up to 867Mbps, offering feature-rich wireless connectivity and reliable throughput from an extended distance.

Optimized RF architecture and baseband algorithms provide superb performance and low power consumption. MT7612U integrates PA/LNA such that the number of the external components is reduced to minimum. Intelligent MAC design deploys a high efficient DMA engine and hardware data processing accelerators which offloads the host processor.

The MT7612U supports the 802.11i security standard and implements hardware acceleration for TKIP, CCMP and WAPI. The device also supports 802.11e QoS for video, voice, and multimedia applications.
