

## DATASHEET

### Wi-Fi Module to PCIe Adapter Card

# ACPCX4-220

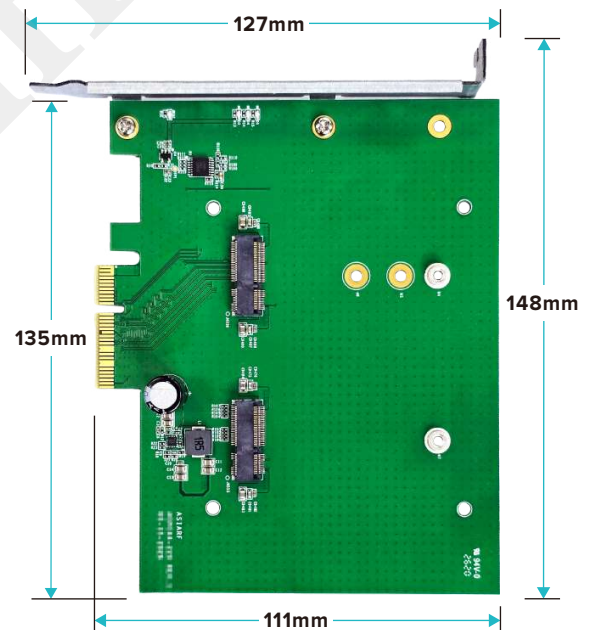

## Dual M.2 A+E Key

## Description

**Converter Card for Dual M.2 A+E Key Wi-Fi Module to PCIe Adapter Card - Stable Connectivity and Multi-OS Support.**

The ACPCX4-220 is a high-performance PCIe x2 in one M.2 A+E Key slot adapter card specifically designed for the AW7995-AE1 Wi-Fi 7 module and compatible with standard M.2 A+E Key wireless modules. Featuring dual M.2 A+E Key sockets and enhanced power delivery, it provides a stable platform for high-performance wireless applications. The adapter enables easy integration of M.2 Wi-Fi modules into standard PCI Express expansion slots, making it ideal for networking equipment, industrial PCs, embedded systems, system development, and wireless solution evaluation.

## Features

- **Designed specifically for the AW7995-AE1 Wi-Fi 7 module**, while remaining compatible with standard M.2 A+E Key wireless modules.
- **Dual M.2 A+E Key sockets** provide greater flexibility for wireless module evaluation, development, and deployment.
- **Enhanced power delivery design** supports stable operation of high-performance Wi-Fi modules, helping meet the power requirements of next-generation wireless applications.
